MOSAICS

Standing the test of time, mosaics have been used for centuries as a decorative art form and to this day their gorgeous and intricate designs are so versatile and can compliment any style and taste.

Helpful Tips

When choosing a mosaic feature it is important to consider the colour tones and what would best compliment your scheme. Contrasting your feature mosaic to your existing tiling is an effective method of highlighting your decorative area and ensuring it catches the eye. Some designers take the subtle approach of blending or perfectly matching their mosaic tiles to their existing tiling. This achieves an enhanced detail that breaks up the room but doesn't introduce additional colours and instead creates a streamline, sophisticated simplicity.

Bathrooms and kitchens are perfect examples of common locations for mosaic tiles to be installed but not limited to. So, take the opportunity to venture outside of the norm and explore the endless options of decorating any space of the home to add a dash of colour, texture, personality and flare. Decorating with mosaics is very simple and can be cost effective way to embellish areas of the home and create a high-end look that could be easily overlooked when building or renovating.

Square Black Floor Waste

ANCILLARIES

The perfect partnership of products that accompany our tile ranges with installation and finishings. The new addition of Ancillaries to our matrix is ensuring we provide you with the best possible products in the industry.

Helpful Tips

Ancillaries are a fundamental necessity and we have worked hard to make selecting products and materials a streamline process for our customers. Selecting the correct materials to use is just as important as the tiles chosen and installation method so feel free to browse through our increased product matrix which include a variety of options to aid in many situations.

Take the opportunity to utilise an essential building element and instead of hiding it away, why not try intentionally showcasing it as a decorative feature. A common practice to selecting the finish to a tile trim is to consider the finish of existing tap ware, shower frames or floor wastes and matching it to complete the look. The shape of a floor waste is often a point of discussion when selecting, some prefer to match the square finish of their tiles, some prefer a softer and more organic round look while others prefer the minimalist, modern style of the tile insert floor wastes. Black matt features have begun to dominate the design world and provide a high-end look and feel at a cost effective level so be sure to consider all finish options for our floor wastes.
